

Peckham Vision News

August 2013

Peckham Vision is a community consortium led by local residents, working with local artists and local businesses pioneering citizen action to revitalise Peckham town centre linking past, present and future for the benefit of all.

Staircase Restoration

Most of the planning and permission work to complete the restoration and link it to the Old Waiting Room has been done by Benedict O'Looney Architects. The next stage is to raise approx £50,000 to add to the £50,000 already raised.

Iron and stone staircase revealed

Old Waiting Room

Peckham Vision is developing proposals to use the room as it is, once the staircase is extended to give access from the forecourt. The room cannot be hired until then. Plans are being developed for raising the funds (approx £750,000) for final restoration.

The Old Waiting Room

Station Gateway project

The Council is developing plans with Network Rail for the new front square and new commercial spaces at the back of the station. There is currently no information about the plans, nor any way the public can contribute to these ideas.

Peckham Rye station c. 1865
