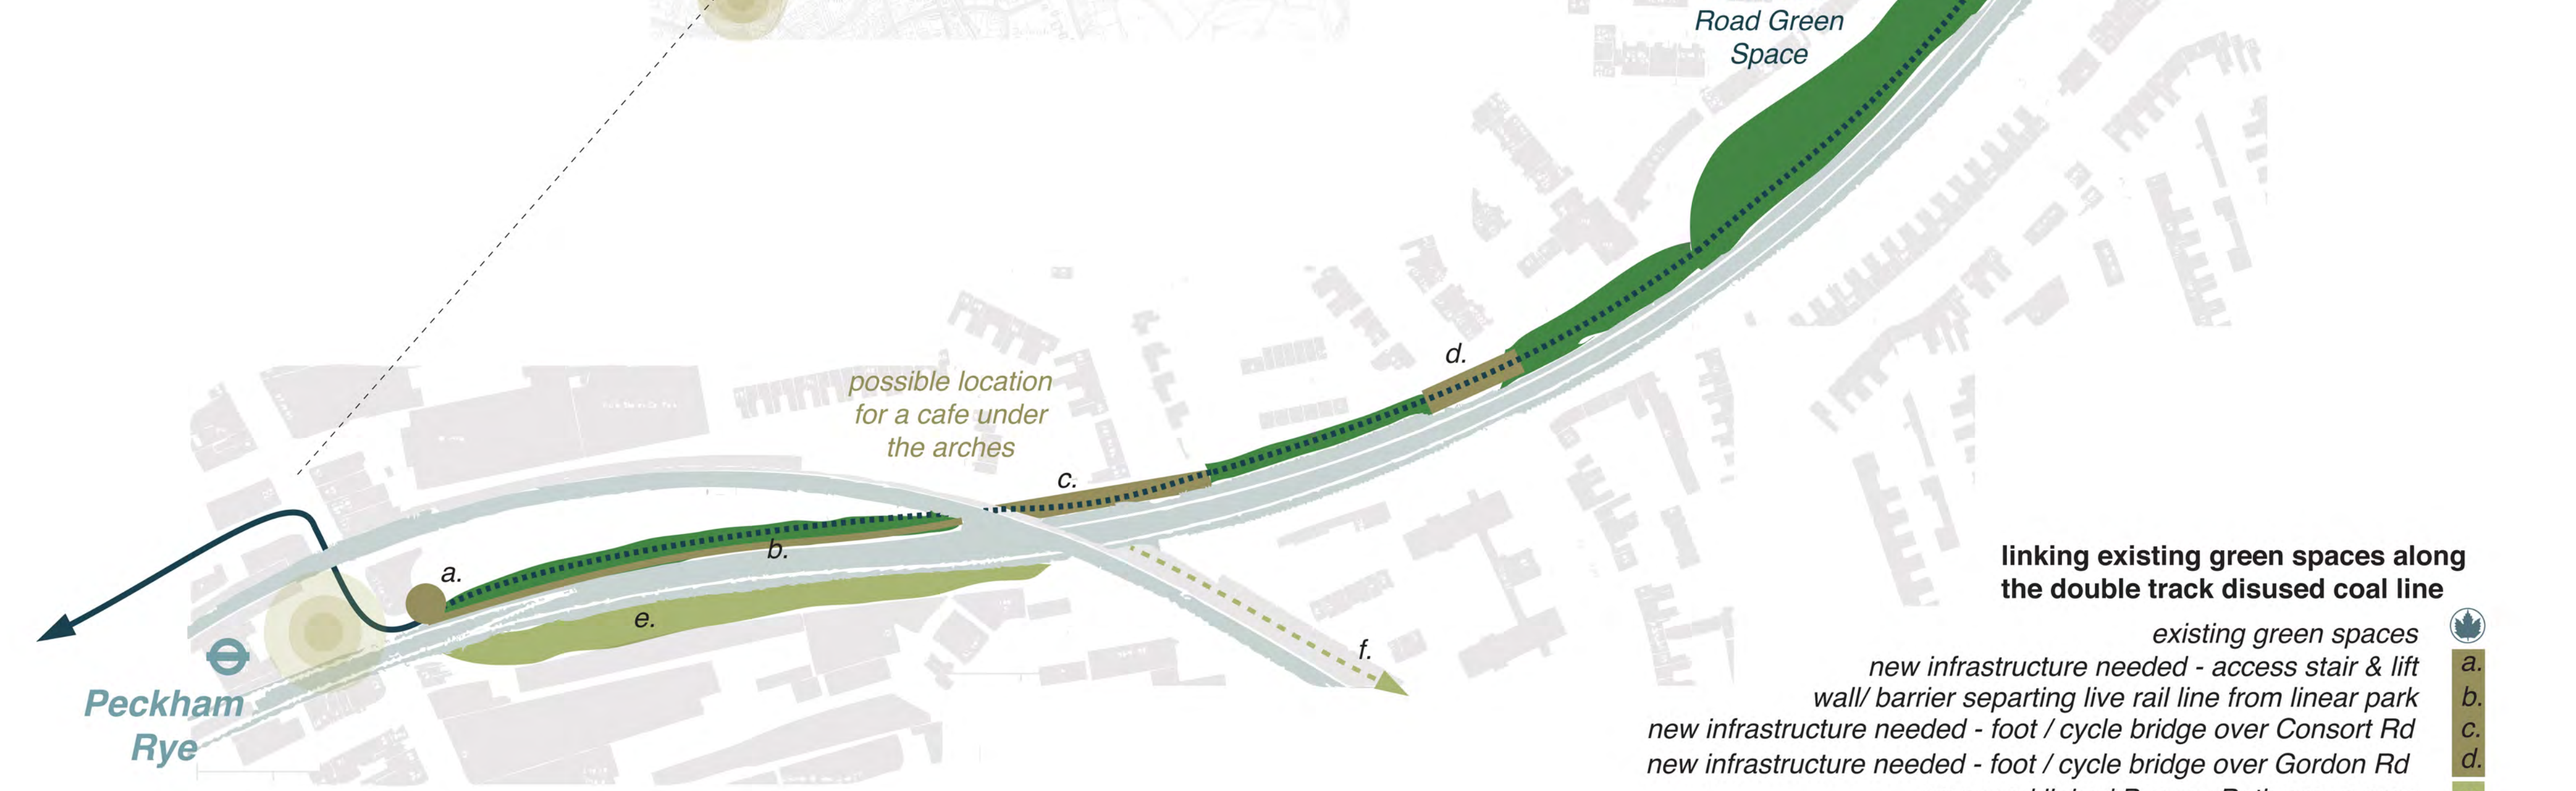
d. new infrastructure needed - foot / cycle bridge over Gordon Rd
e. proposed linked Bussey Path green area
f. potential for future greenway towards Nunhead



THE COAL LINE: linking into wider walking & cycling networks

The Coal Line project proposes to create a link between existing cycle networks in the east and west of south London via the disused coal railway siding passing between Peckham Rye and Queens Road Peckham. This link would create a new 900m linear park linking the existing green spaces of Kirkwood Road and Holly Grove. The link would create a new east-west route enabling users to reach the Thames on a new route that would be 80% greenway, free from cars.
